ABOUT US

Global Special Effects is the largest visual special effects company in the world. We specialize in Evaporative Snow™, foam, fog, cryo, bubbles, confetti, Flogos™, and all the fluids and accessories that go along with them.

Our special effects have been featured in thousands of major motion pictures, commercials, and music videos. We also have contracts with all major theme parks and attractions around the world.

OUR STORY

In 1990 innovative magician, Francisco Guerra, was on the hunt for an artificial snow machine for his next magic performance. After searching high and low with no luck finding a machine, he invented his own. From there, his first company, Snow Masters, was born. Through many years of success, SnowMasters expanded its manufacturing to produce an array of special effect machines for the entire industry, which has since transformed into Global Special Effects.

Today, Global Special Effects is the world's largest manufacturer of visual special effects products and accessories nestled in the beautiful rolling hills of Lexington, Alabama, USA. Our company was created from innovation, and developing innovative visual special effects technology continues to be a top priority at Global Special Effects. We are a financially strong company with an exceptional and dedicated workforce. Some of the core strengths of our company are the following attributes:
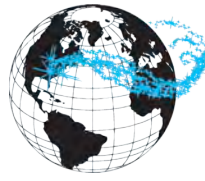

>> INNOVATION

We possess several U.S. and international patents relating to Francisco Guerra's special effects technology and machines. We believe that continual improvement and innovation is the key to future growth for Global Special Effects.

>> QUALITY

We take pride in providing exceptional product quality. All of our machines are sold with a warranty which covers repairs or replacements. Our customers continually return to receive the same great service and quality products year after year.

>> PRODUCT LINE

Today, we manufacture much more than the Evaporative Snow™ that originally started our business. We provide exceptional special effects machines including snow, foam, cryo, fog, bubbles, scent, and our line of specialty Flogos machines.

SNOW MASTERS
Manufacturing the finest snow machines in the world!

SPECIFICATIONS

Size of Unit: 25"L x 18"W x 25"H
Weight: 60 Pounds
Material: Rugged Polypropylene

Electrical requirements
1-15amp, 110v circuit per machines.
Also available: 100V and 220V
Warm Up Time: NONE
Noise Levels: 75db @ 10'

Distance of Snow
From ground base: Throw: 50 feet plus
Width: Over 20 feet
Hanging Throw: 50 feet plus (Starting height of 10')
Width: Over 20 feet

Snow Flake Control
Size of Flake: Light to snowstorm. Snowflake can be adjusted by DMX control, hardwired control or stand-alone controls.

Fan Control
1/3 Horsepower 20 inch impeller
Variable speed control on the actual machine. Remote on/off by DMX or Hardwire remote.
CFM; Max 4765

Standard Color Available: Black or White

Evaporative Time
Small to Medium Flakes: 30 to 90 seconds
Large Flakes: 90 to 120 seconds.

Snow Machine Controls
Lighting Console: Non-dim circuits patch to separate channels.
Remote: 30' hardwire controller
DMX: USITT Standard: 4 Channels
    Channel 1 On/Off
    Channel 2 Timer Length of Cycle
    Channel 3 Duration of Cycle
    Channel 4 Flake Size

Liquid Capacity
Tank Capacity: One gallon/4 liters or external 5 gallons
Snow Production Per Gallon: 1 to 1.5 hrs
For Continous Use, Try the Auto Refill Station

Flocking Machine

SPECIFICATIONS

Dimensions: 21" x 22" x 50"
Weight: 70 lbs. empty (230 lbs. Full)
Material: 3/16" Aluminum
Description: This machine is designed for ground, tree, or bush snow coverage in outdoor events. The SnoFoam we use in our products is very eco friendly and evaporative. The snow tends to last for around 4 hours depending on the temperature of the climate. Our flocking machine is easily mobile and will cover about 700 square feet of straight ground coverage per tank. Comes standard with 20' hose or longer per request.

Electrical Requirements
(Compressor recommended)
110v or 220v
4.9 scfm@ 90 psi
1.6 hp 33 gal.

Distance
Throw: 10' to 15'
Width: 1' to 2'

Liquid Capacity
Tank Capacity: 30 gallon
1 tank covers approximately 700 square feet of ground coverage. Coverage on trees and bushes may vary. Fluid used: Flocking fluid.

Control Options
Variable liquid and air flow controls on board

FAUX SNOW

specifications

About:
Faux Snow is a biodegradable power that when mixed with water looks and feels like snow/ice and can be used in theater sets as well as exterior scenes for a realistic snow look.

Instructions:
1. Place 2 tbsp of Faux Snow in a clean container.
2. Place ~1/2cup of water and watch it slowly turn into snow! (mix ratio[powder/water]:1/4.5)
3. Stir a few times until most of the water is absorbed.
4. Gradually add more water for the consistency of snow that you prefer.
(full instuctions, measuring cup, & MSDS sheets are inside the container.)

Size:
Comes in containers of 1.5lbs of powder.
(makes over 50lbs of snow)

Coverage Yield:
One 1.5lb pail mixed with 6.75gl of water can cover as much ground as 1,879.5 sq/in (13.05 sq/ft.)

Warning:
This product is not for human consumption.

SNOW FLUIDS

>> EVAPORATIVE SNOW™ CONCENTRATE

8 oz. Evaporative Snow™ Concentrate per 120 oz. of water. One gallon of Evaporative Snow™ Concentrate yields 16 gallons of ready-to-use fluid. One gallon of ready-to-use fluid produces up to 60 minutes of continuous snow depending on desired size of snowflake and machine settings. Guaranteed never to clog our machines or leave residue. Available in 8 oz, 1 gal, 5 gal, and 55 gal.

>> EVAPORATIVE SNOW™ PRE-MIX

The Evaporative Snow™ Pre-Mix is ready-to-use. No dilution necessary. One gallon produces up to 60 minutes of continuous snow depending on desired size of snowflake and machine settings. Guaranteed never to clog our machines or leave residue. Available in 1 gal, 5 gal, and 55 gal.

>> EVAPORATIVE SNOW™ SCENTED PRE-MIX

The Evaporative Snow™ Scented Pre-Mix is the same great quality snow fluid in all your favorite scents. Ready-to-use. No dilution necessary. One gallon produces up to 60 minutes of continuous snow depending on desired size of snowflake and machine settings. Guaranteed never to clog our machines or leave residue. Sold in 1 gallon bottles. Global Special Effects can create custom scents to fit your need! Some of our best-selling scents are: Christmas Morning, Apple Cinnamon, Brown Sugar, Vanilla, Gingerbread, Candy Cane, Pina Colada, and Bubble Gum.

>> EVAPORATIVE SNOW™ UV-ADDITIVE PRE-MIX

The Evaporative Snow™ UV-Additive Pre-Mix is ready-to-use. It has the same great quality formula as the original Evaporative Snow™ but now with the ability to glow under black light. One gallon produces up to 60 minutes of continuous snow depending on desired size of snowflake and machine settings. Guaranteed never to clog our machines or leave residue. Sold in 1 gallon bottles.

GLOBAL SPECIAL EFFECTS

>> VALUE SNOW

Value Snow is a variation of the Evaporative Snow™ fluid. It has a slightly different formula and longer evaporation time. Value Snow is ready-to-use. No dilution necessary. One gallon produces up to 60 minutes of continuous snow depending on desired size of snowflake and machine settings. Guaranteed never to clog our machines or leave residue. Available in 8 oz. and 5 gallon bottles.

>> AMAZING SNOWMAN FLUID

This formulation is designed for The Amazing Snowman only. The Amazing Snowman fluid is sold as a 6-pack of (3) oz. bottles. Just add distilled water and let the fun begin! Mix (1) 3 oz. bottle of Amazing Snowman fluid with 1/2 gallon of distilled water for 15 minutes of run time. (1) 6-pack of Amazing Snowman fluid produces 1.5 hours of run time.

>> FLOCKING FLUID

Flocking Fluid is designed exclusively for our Flocking Machine. It produces a large amount of thick snow. This solution is a concentrate and has a dilution ratio of 1 part Flocking Fluid to 30 parts water. Sold in 1 gallon bottles.

>> SNOW-GLOW

Snow Glow is a UV Reactant Additive that can be mixed with snow solution to produce a snow that glows under black light. Mix (1) 8 oz. bottle of Snow Glow with 1 gallon of ready-to-use snow fluid to produce a UV Reactant snow. Available in individual 8 oz. bottles or a case of (12) 8 oz. bottles.

SNOW CLEANER

>> NO CLOG LIQUID LINE CLEANER

The No Clog Liquid Line Cleaner is a unique formula used to keep snow machine fluid lines clean and in working order. Use 3 oz. of No Clog Liquid Line Cleaner to run through your snow machine after use. Available in 8 oz bottles, a case of (12) 8 oz. bottles, or 1 gallon bottles.

GLOBAL SPECIAL EFFECTS

SNOW ACCESSORIES

>> FAUX SNOW GROUND COVER

Faux Snow is the most realistic artificial snow on the market! Just add water to produce snow that is cold to the touch and looks just like the real thing. Faux Snow is ideal for producing realistic snow cover on the ground. It's biodegradable, non-toxic, and environmentally safe! Available in 1.5 lb or 5 gallon buckets.

>> FAUX SNOW BLANKET

Faux Snow Blankets are great for creating the perfect snow scene. This flame resistant product allows you to make a scene that takes on new form when you create snow-covered hills, rooftops, and valleys that look like you just walked into a snow wonderland. Each Blanket is 27 inches by 20 yards, giving you a total of 135 square foot.

>> THEATER SNOW

Our plastic shredded theatrical snow is ideal for a snow curtain drop or ground cover. It floats like a dream. Great for video and displays. One box can cover an area of 5X5 by 3 inches high. Used in display windows throughout the world. Great for cars, window ledges, around trees, in trees, and covering up bushes.

>> SNOW CURTAIN

This product is light, easy to use, and gives you a real snowfall, using our theater snow, that accumulates and is totally recyclable. Controlled by remote control, DMX or Non-dim power.

GLOBAL SPECIAL EFFECTS

>> WEATHER RESISTANT SNOW MACHINE COVERS

These weather resistant snow machine covers are the perfect way to enjoy your Evaporative Snow™ Machines outdoors rain or shine. Made out of all weather vinyl. This cover allows for easy access to controls and fluid reservoir. Available for T-1000, T-1100, T-1500 Mini, T-1500 Max, T-1600, and SnowStorm.

>> ZIG OSCILLATOR

The Zig Oscillator is a motorized rotating mount. Rotates machine between 15, 45 or 90 degrees. 4-Channel DMX control with variable standalone features. Includes Snow Machine mount and truss attachment via dual C-Clamps. t will increase the spray pattern from one machine to the equivalent of 3 machines. 75 lb hanging weight capacity.

>> HEAVY DUTY 2" C-CLAMP

The C-Clamp is designed to securely hold your machine in place when hung from places like a truss. It is created from high tensile, aircraft grade, extruded aluminum, so its both stronger and lighter than cast iron clamps. The C-Clamps safety factor far exceeds industry standards, breaking at over 2-1/2 tons.

>> AUTOMATIC REFILL SYSTEM

The Automatic Refill System maintains fluid levels in your special effects devices. Although it was designed for use in Global Special Effects machines, the Automatic Refill System is compatible with all other equipment that uses liquids. The system detects fluid level in the equipment's small built in reservoir and signals a transfer pump connected to a multi-supply drum to refill the reservoir, all without user intervention. This is an ideal solution for installations with limited or difficult access such as ceilings or stages.

GLOBAL SPECIAL EFFECTS

>> DMX RELAY CONTROLLER MODULE

The DMX Relay Controller Module is designed for all Evaporative Snow™ Machines, Cryo Jets, Bubble Machines, Fog Machines, Foam Machines, etc. This is ideal for any machine that does not have an internal DMX control. The line voltage relay pack plugs directly into the power input of the machines.

>> PAIL MOUNTING BRACKET

The Pail Mounting Bracket is designed to hold a 5 gallon bucket alongside any of the Global Special Effects machines. This accessory is ideal when hanging machines on a truss, so users don't have to keep taking machine down to refill with fluid. Mount it alongside your machine for all the fun without the headache.

>> HARD WIRE REMOTE

The Hard Wire Remote operates as a remote control source to operate snow machines on the 900 mode. This accessory includes a 25 foot, 5 pin DMX male quick connect. It is compatible with any two channel device. When used in any snow machines it can be daisy chained to as many machines as necessary.

>> MASTER BLASTER CONTROL BOX

The Master Blaster Control Box is designed to make controlling "instant-on" effects a breeze. This accessory can control up to 4 machines at once. Ideal for situations like special announcements/celebrations when you want special effects to appear at a specific time. Simply hold down the red button when you want the effects to appear.

FOG FLUIDS

>> DENSE FOG FLUID

The Dense Fog Fluid is our best-selling fog solution. It produces a dense fog, that you can still see through, that lasts approximately 3-4 hours. This is the fluid most customers use in fog machines. Available in 1 gal, 5 gal, and 55 gal.

>> LONG LASTING FOG FLUID

The Long Lasting Fog Fluid produces a dense fog, that you can still see through, that lasts 6-9 hours depending on the environment. This is the fluid for someone who wants a semi-dense fog that lingers. Available in 1 gal, 5 gal, and 55 gal.

>> DENSE LONG LASTING FOG FLUID

The Dense Long Lasting Fog Fluid produces a very intense, dense, and long lasting fog that cannot be seen through. This solution is often used by Fire Departments when training. Available in 1 gal, 5 gal, and 55 gal.

>> QUICK DISSIPATING FOG FLUID

The Quick Dissipating Fog Fluid produces a fog that dissipates in minutes. This solution isn't very dense and has more of a haze look. Ideal for someone who wants a light fog effect. Available in 1 gal, 5 gal, and 55 gal.

>> EXTRA QUICK DISSIPATING FOG FLUID

The Extra Quick Dissipating Fog Fluid produces a fog that dissipates within seconds. This solution isn't very dense and has more of a haze look. Normally produces a haze that stays below the knees. Available in 1 gal, 5 gal, and 55 gal.

>> CHILLER FOG FLUID

The Chiller Fog Fluid is designed for use in the Low Lying Fog Machine only. This fluid produces fog that lingers below the knee. Available in 1 gal, 5 gal, and 55 gal.

CRYO-JET

specifications

Dimensions:
9"L x 5"W x 11"H
Weight: 7 lbs

Material:
Stainless Steel/Mild Steel

Hardware:
20' 3000 PSI hose & standard CO2 tank connection
PSI: 0-2500
Noise Level: 105 db
Electric: .3amp, 34 watt, 110v circuit per unit. (Also available in 220v & 100v)

Features:
Cryo- Jet fog plume shoots up to 20' high. Plume top is about 4' in width.
Standard wall plug (also available: CO2 blaster relay, DMX relay.)
Built in L bracket. Optional C-clamps can be purhased for top/side mount.
Mounting holes for attachment to any solid surface.

Available Accessories:
Toilet paper launcher
Confetti Tubes
T-Shirt Launcher

CRYO ACCESSORIES

>> 4-WAY MANIFOLD SPLITTER

The 4-Way Manifold Splitter is used to attach four CO2 tanks to one Cryo Jet or Cryo Gun.

>> 2-WAY MANIFOLD SPLITTER

The 2-Way Manifold Splitter is used to attach two CO2 tanks to one Cryo Jet or Cryo Gun.

>> CRYO HOSE

The Cryo Hose is used to extend hose length between a CO2 tank and a Cryo Jet or Cryo Gun.

>> DUAL CRYO CONNECTOR

The Dual Cryo Connector is used to attached 2 Cryo Machines to a single CO2 tank.

GLOBAL SPECIAL EFFECTS

>> CRYO JET RE-BUILD KIT

This re-build kit is intended for use with the Cryo Jet only.

>> CRYO GUN RE-BUILD KIT

This re-build kit is intended for use with the Cryo Gun only.

>> CRYO FILTER

The Cryo Filter is used to filter loose particles of CO_2 in hose before it enters the Cryo Jet or Cryo Gun.

>> MEDICAL FITTING FOR DEWER TANK

This adapter is used to modify a standard CO_2 fitting into a medical fitting.

>> POOR MAN'S CONFETTI STREAMER

The Poor Man's Confetti Stream is designed for use with the Cryo Jet. Load up your least favorite roll of toilet paper on the paint roller-like handle and let 'er roll! This accessory creates a blend of confetti and streamers that are sure to surprise and get a laugh. Thinner toilet paper produces more of a confetti effect, while thicker toilet paper produces more of a streamer effect.

FOAM
FLUIDS

>> HIGH DILUTION FOAM FLUID

High Dilution Foam Fluid is designed to produce the perfect high-quality dry foam. This product is a concentrate that must be diluted with clean water. To produce ready-to-use fluid, mix 50 parts water to 1 part foam solution. Meaning, 1 gallon of High Dilution Foam Fluid produces 51 gallons of ready-to-use foam fluid. Foam Machines have a fluid consumption rate of approximately 50 gallons of fluid per hour. Available in 1 gal, 5 gal, and 55 gal.

>> UV HIGH DILUTION FOAM GLOW FLUID

UV High Dilution Foam Glow is a UV Reactant Additive that produces foam that glows under a black light. The dilution ratio remains 50 parts clean water to 1 part foam solution. Meaning, 1 gallon of UV High Dilution Foam Glow Fluid produces 51 gallons of ready-to-use foam fluid. Foam Machines have a fluid consumption rate of approximately 50 gallons of fluid per hour. Foam is available in white, yellow, and red. Sold in 1 gallon bottles.

>> SCENTED HIGH DILUTION FOAM FLUID

Scented High Dilution Foam is the same high-quality foam fluid with playful scents for an additional level of detail. The dilution ratio remains 50 parts clean water to 1 part foam solution. Meaning, 1 gallon of Scented High Dilution Foam Fluid produces 51 gallons of ready-to-use foam fluid. Foam Machines have a fluid consumption rate of approximately 50 gallons of fluid per hour. Global Special Effects can create custom scents to fit your need! Some of our best-selling scents are: Christmas Morning, Apple Cinnamon, Brown Sugar, Vanilla, Gingerbread, Candy Cane, Pina Colada, and Bubble Gum.

>> VALUE FOAM FLUID

Value Foam is designed with the economy user in mind. This product is a concentrate that must be diluted with clean water. To produce ready-to-use fluid, mix 50 parts water to 1 part foam solution. While HDF fluid produces a dry foam, Value Foam produces a somewhat wet foam.
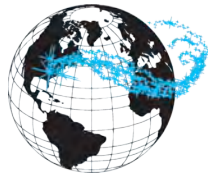

GLOBAL
SPECIAL EFFECTS

>> FOAM TINT ADDITIVE

Foam Tint Additive is the perfect way to personalize your foam and take the entire experience to the next level. Just add one 4 oz. bottle of Foam Tint Additive into 50 gallons of clean water with 1 gallon High Dilution Foam and you're ready to go! Imagine green St. Patrick's Day foam, blue 4th of July foam, or pink Breast Cancer Awareness foam. However, it's important to note this tint does have the possibility to stain depending on the concentration of the mixture.

>> DE-FOAMER

Although not necessary, De-Foamer easily dissipates large volumes of foam to make clean up a breeze. It is a ready-to-use fluid, no dilution necessary. Simply apply and watch the foam instantly shrink. Then, use a Shop Vac or bucket & mop to clean up the remaining foam.

The ScentZone 100

For Specific Customer Touch Points

The ScentZone 100 is a fragrance delivery system for specific targeted areas, creating an area of sensory experience for your guests, clients or patients. Thoroughly covering an area of over 2500SF, the ScentZone 100 uses a dry-wave technology keeping the area free of damaging and cumulative deposits, oils, or damp spritzers.

For easy handling, the ScentZone 100 operates a closed dry scent cartridge - replaced by mail on a monthly rotation (360 hours run time).

For easy operation, the ScentZone 100 has an LED interactive screen for select programming and pinpoint fragrance delivery.

With a sleek, high tech design of all US Steel – the ScentZone 100 is a perfect solution for customer touch points in your business, creating fragrance experiences for under $3.00/day.

The AromaStat I

For Wide Area Diffusion with Multiple Fragrance Delivery

The AromaStat I is a fragrance delivery system for large, open areas of your business. Following the airflow of your HVAC system, the fragrance can adequately cover over 10,000 square feet. The AromaStat I is the only dry-wave system for wide area scent diffusion in the industry. By using our unique closed-system cartridges, there is no direct handling of oils or refilling bottles. Your ducts are kept clear of dangerous cumulative oily deposits, system wide.

For easy installation, the Aromastat I comes with simple instructions and 24/7 full tech support.

For easy operation, the Aromastat I has a super-sleek LED interactive panel for system wide adjustment of time settings, all at the touch of a finger.

With cutting edge interactive technology made in the USA – the Aromastat I is a custom solution for your wide area fragrance disbursement.
